Lecture - 41
Trade Promotion, Institutions Involved in Export Finance,
Foreign Trade Organizations in India

Hello everyone. So, I welcome you to the lecture on International Business. So, today we will be continuing from our last lecture where we had stopped, where we will be discussing about Foreign Trade Promotion measures.

And here we are discuss largely about what is trade promotion and what is it is role in the development of a the country right, on the economic perceptive.

Then in the last lecture we also discussed about the trade regulations and it is issued by the commerce ministry we are discuss that. Then, we also discussed about the measure destinations for export and import, for Indian exporters and you know Indian exporters.

And we discussed that there are several countries to which India exports a lot of commodities and services. And also imports a largely from especially in the petrochemical and other sectors right.

So, from there we also discussed about how you can start and somebody can start an export import business. And then we talked about the difficulties in exporting. And finally we talked about the we had started with the schemes right, what are the schemes that the government has you know has initiated, which will help in the export import businesses right.

So, we will continue from there. So, let us talk let us start with the definition of trade promotion again. So, as you understand.

(Refer Slide Time: 01:51)

Trade promotion

- **Trade promotion** is an umbrella term for **economic policies, development interventions** and private initiatives aimed at improving the **trade performance** of the country or a region within a country, or a group of countries involved in an **economic trade area**.
- **Trade promotion** is also sometimes known as **export promotion**. “The **export promotion** is basically promoting, supporting and assisting firms in entering international markets and achieving optimum opportunities from their international business activities and thereby encouraging exports in India”. Some major Indian export companies are Reliance (oil, gas), Tata (cars, Trucks), BHEL (electrical equipment), JSW Steel (iron, steel) etc.
- Recently the 9th Session of the India-Kenya Joint Trade Committee was held in New Delhi on 19-20 August, 2019 in order to promote India-Africa trade and economic relations.

IT ROORKEE | NFTEL ONLINE CERTIFICATION COURSE

Trade promotion is an umbrella term for economic policies and developmental interventions and private initiatives, which is aimed to improve the trade performance of a country right.

So, it may be within region or within the country or among a few countries right, or a group of countries involved in an economic trade area. So, for example, some of the major companies I had discussed is like for example Tatas, Reliance, BHEL, JSW Steel right.

Then there are almost there large numbers of companies, which are involved in exporting of goods right from India. And the export the exporting of goods is highly essential because we earn foreign reserves through that, foreign exchange through that right. So, it is becomes very important.

So, then we talked about some of the schemes that the government has brought in recently and since some year right and to facilitate this export import business.

(Refer Slide Time: 02:43)

Foreign Trade Promotion Measures and Schemes in India

- ❑ Various trade promotion measures and schemes are available for business firms to facilitate their export and import operations announced by the government in its export-import (EXIM) policy.
- ❑ Major foreign trade promotion schemes and organizations are discussed below:
 1. Duty drawback scheme ✓
 2. Export manufacturing under bond scheme ✓
 3. Advance license scheme ✓
 4. Export of Services
 5. Export Finance
 6. Export Promotion Capital Goods
 7. Export Processing Zones (EPZs)
 8. 100% Export Oriented Units (EOUs)

IT ROORKEE | NPTEL ONLINE CERTIFICATION COURSE

So, various trade promotional measures and schemes are available for business firms to facilitate their export and import operations, announced by the government in its export import policy.

So, the government in its export import policy has brought in several schemes. So, in the last class we had discussed about these three schemes, the duty draw back scheme, export manufacturing under bond scheme and the advance license scheme right.

(Refer Slide Time: 03:22)

4. Export of Services

- Services include all the **161 tradable services** (accountancy services, legal services, tourism services, health and social services, transport services, education services, and so on) covered under the **General Agreement on Trade in Services** where payment for such services is received in **free foreign exchange**.
- Service exporters are required to register themselves with the **Federation of Indian Exporters Organization**. However, software exporters shall register themselves with **Electronic and Software Export Promotion Council**.
- The IT industry in India is a key part of the country's economy. In 2017, information technology and its various subsectors represented almost **eight percent** of the nation's overall GDP. In financial year 2019, this industry in India generated an annual revenue close to **180 billion U.S. dollars**, a significant increase from the generated revenue ten years ago. A majority of this revenue was generated in exports while domestic revenue totaled to less than **50 billion U.S. dollars** for the mentioned period.

IT ROORKEE | NPTEL ONLINE CERTIFICATION COURSE

Now, we will continue from the fourth one. So, the fourth one which is the export of services right. So, as you know services can be defined generally in terms of marketing as something which is intangible or something which is you know which does not have a physical form, which is not tangible basically largely right.

So, services include all the 161 tradable services for example, like accountancy, services, legal services, tourism health and social services, transport, education and so, on which is covered under the general agreement on trade in services right, so we say GATS, GATS. So, where payment for such services is received in foreign, free foreign exchange right.

So, exports of services is especially very important for India right, India has been one of the major contributors to the GDP has been India service sector right.

So, service sectors are required how one goes about service sectors are required to register themselves, with the federation of Indian exporters organization. So, this is an organization which is a premier organization and it is, it represents the Indian exporters in the it helps in promoting the Indian exporters in the world market right.

However, software exporters there is the special registration process they have to register themselves with the electronic and software export promotion council ok. Because software although it is one of those services which is which has a significant presence in the among the services.

As you can see the IT industry in India is a key part of the country's economy, in 2017 it is various subsectors represented almost 8 percent of the nation's GDP. In 2019 this industry generated an annual revenue close to 180 billion US dollars which was a significant increase from the generated revenue a decade back right.

So, a majority of this revenue was generated in exports right, while domestic revenue totaled to less than 50 billion right US dollars for the mentioned period. So; that means, that are export in services is a very significant factor for growth and it takes a large size in the entire business.

(Refer Slide Time: 05:39)

5. Export Finance ✓

- **Credit and finance** are the life-blood of business whether domestic or international.
- **Export financing** is loans made for the shipping of products outside a country.
- Financial Assistance is extended by the banks to the exporters at **Pre-shipment and Post-shipment stages**.
- **Pre-shipment / Packing Credit**: means any loan or advance granted or any other credit provided by a bank to an exporter for financing the purchase, processing, manufacturing or packing of goods prior to shipment / working capital expenses towards rendering of services on the basis of letter of credit opened in his favour or in favour of some other person, by an overseas buyer or a confirmed and irrevocable order for the export of goods / services from India or any other evidence of an order for export from India having been placed on the exporter or some other person, unless lodgement of export orders or letter of credit with the bank has been waived.
- **Post-shipment Finance**: Post-shipment finance refers to the credit extended to exporters after the shipment of goods for working capital requirement. Post-shipment finance is generally provided in order to bridge the gap between shipment of goods and the realization of proceeds. The finance is available at concessional rates of interest to the exporters.

IIT ROORKEE | NPTEL ONLINE CERTIFICATION COURSE

The next part of the schemes in which the government has brought in is relating to the export finance right.

So, as you know credit and finance right are the life blood of business. So, the you know the most important part for any business is that it has to have the right finance right. So, if credit facilities are financial financing, facilities are not available business is would not grow well.

So, export financing is loans made for the shipping of products outside a country. Now, financial assistance is extended by the banks to the exporters at pre shipment and post shipment stages. So, what happens? So in order to you know encourage and help the business, the government has initiated schemes, which helps in financing the exporters and even for import purpose right.

So, what it does basically? It says it is through the banks right, the financial assistants is extended to the exporters and at what stages? At the pre shipment and post shipment stages. Now what is a pre shipment and a post shipment stage let us see.

So, the pre shipment stage also called as packing credit; means, any loan or advanced advance granted. Or any other credit provided by a bank to an exporter for financing the purchase, processing, manufacturing or packing of goods prior to the shipment; that means, anything before the final shipment is done.

So, for that or for, in another way you can understand it as the working capital expenses towards rendering of services on the basis of a letter of credit opened in his favour or in favour of some other person by an overseas buyer right.

So, this is basically, when you talk about pre-shipment for all the working capital expenses and all the banks give the finance right. Then, in post-shipment finance what happens here it refers to the credit extended to the exporters after the shipment of. So, there is shipment. So, pre shipment and post shipment after the shipment right of goods for the working capital requirement.

Now post shipment finance is generally provided, in order to bridge the gap between shipment of goods and the realization of the proceeds. So, there is a gap in which the you know exporter exports and he receives the proceeds.

So, in between this time, so there is a requirement of finance. So, for this reason the banks or the government makes has made such schemes right. The finance is available at concessional rates of interest to the exporters. So, the in order to encourage the exporters to do more business.

The government has try made this scheme and try to make it lucrative by offering them at the finance at a lower interest rates ok.

(Refer Slide Time: 08:37)

Institutions involved in export finance:

Number of institutions have not only emerged in providing export finance but even the existing institutions have opened up various avenues in granting export finance. The institutions are:

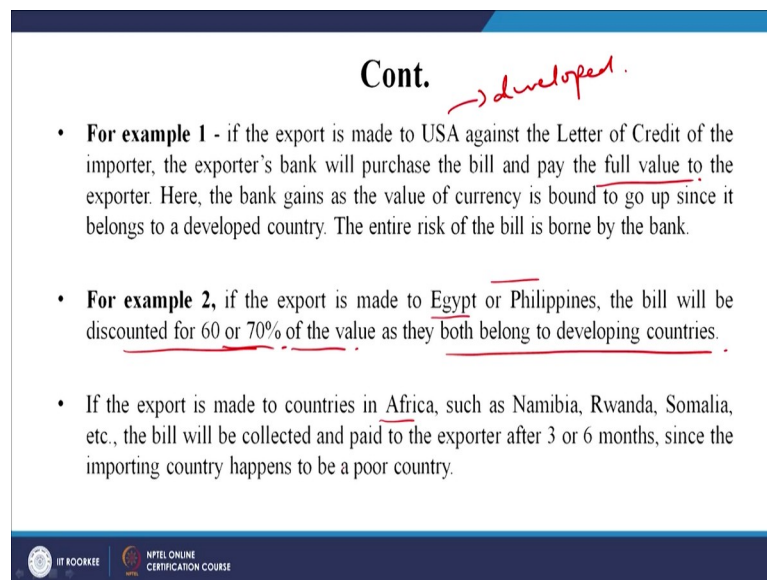

- Export Import bank ✓
- Commercial banks, both nationalized and non-nationalized
- Development banks such as IDBI, ICICI, etc.
- Small Industries Development Bank of India
- State Finance Corporations
- National Small Industries Corporation
- Export Credit Guarantee Corporation.

IT ROORKEE | NPTEL ONLINE CERTIFICATION COURSE

Now some of the institutions which are involved in export finance are, for example there are number of institutes for some of them are for example, the EXIM Bank. We say Export Import Bank, the commercial banks, both nationalized and non nationalized development bank, such as IDBI, ICICI etcetera, SIDBI, Small Industries Development Bank of India.

State Financial Corporation's right National Small Industries Corporation, Export Credit Guarantee Corporation. So, these are some of the institutions which are there in order to lend finance to the exporters. So, that it could easily carry on its activity and you know make its export in a much better way right example.

(Refer Slide Time: 09:26)

The slide contains the following text:

Cont. *→ developed.*

- **For example 1** - if the export is made to USA against the Letter of Credit of the importer, the exporter's bank will purchase the bill and pay the full value to the exporter. Here, the bank gains as the value of currency is bound to go up since it belongs to a developed country. The entire risk of the bill is borne by the bank.
- **For example 2**, if the export is made to Egypt or Philippines, the bill will be discounted for 60 or 70% of the value as they both belong to developing countries.
- If the export is made to countries in Africa, such as Namibia, Rwanda, Somalia, etc., the bill will be collected and paid to the exporter after 3 or 6 months, since the importing country happens to be a poor country.

At the bottom of the slide, there are logos for IIT ROORKEE and NPTEL ONLINE CERTIFICATION COURSE.

If the export is made to USA against the letter of credit of the importer let us say. So, there is an importer and against the letter of credit of the importer the exporter's bank will purchase the bill right, and pay the full value to the exporter right.

Here the bank gains as the value of currency is bound to go up, since it belongs to a developed country and the entire risk of the bill is borne by the bank. So, it is not necessary it will happen all the time, but there could be times when it might not happen also, so but then this risk is borne by the bank right.

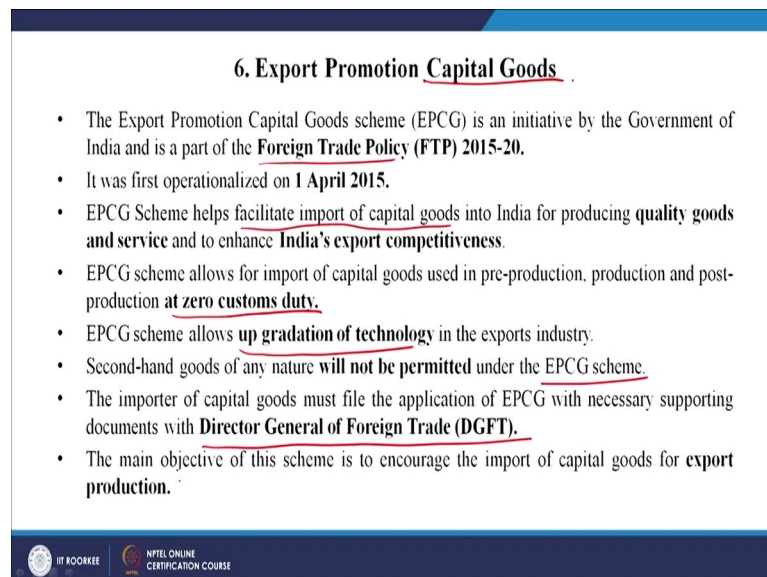

Example two if you see, if the export is made to suppose Egypt or Philippines, the bill will be discounted for 60 or 70 percent of the value as they both belong to developing countries.

Now, that is very interesting you see again if you see what is happening if the export is made to a developed country. So, this is the developed country USA. So, in that case the you know the bank gives the full value right, but when it is going to a country which is developing or less developed.

So, in that case he will the bill will be discounted only to 60 to 70 percent. So, that you know the if there is any risk which, is possibly which might be there. So, that will not be much and it will be neutralized.

If the export is made to countries in Africa such as Namibia, Rwanda, Somalia etcetera, then what does the what is the process? The bill will be collected and paid to the exporter after 3 to 6 months, since the importing country happens to be a poor country. So, these are some of the you know ways how do the, how the banks operate and try to nullify the risks associated with this different countries ok.

(Refer Slide Time: 11:17)

6. Export Promotion Capital Goods

- The Export Promotion Capital Goods scheme (EPCG) is an initiative by the Government of India and is a part of the Foreign Trade Policy (FTP) 2015-20.
- It was first operationalized on 1 April 2015.
- EPCG Scheme helps facilitate import of capital goods into India for producing **quality goods and service** and to enhance India's export competitiveness.
- EPCG scheme allows for import of capital goods used in pre-production, production and post-production at zero customs duty.
- EPCG scheme allows up gradation of technology in the exports industry.
- Second-hand goods of any nature will not be permitted under the EPCG scheme.
- The importer of capital goods must file the application of EPCG with necessary supporting documents with Director General of Foreign Trade (DGFT).
- The main objective of this scheme is to encourage the import of capital goods for **export production**.

IT ROORKEE | NPTEL ONLINE CERTIFICATION COURSE

Another important measure which, the government initiated is the Export Promotion Capital Goods. So, we say EPCG right. So, what is it it is an initiative by the government of India and is a part of the foreign trade policy 15-20.

It was first operationalized on 15, a first April 2015. So, April this is the fool's day right. So, first April so, EPCG scheme helps to facilitate import of capital goods into India for producing quality goods and services.

So, for suppose for example, to make some you know some items you need to import certain capital goods right. So, for that you this EPCG scheme helps in this process right and to enhance finally India's export competitiveness.

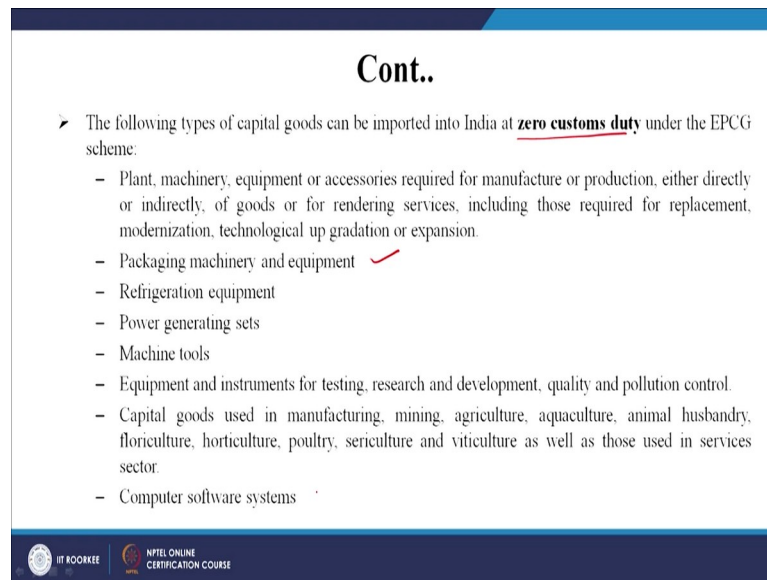

So, this is one big important role of this EPCG. It also allows for the import of capital goods used in pre production, production and post production at zero customs duty ok. This schemes allow for allows up gradation of technology in the exports industry right.

Second hand goods of any nature will not be permitted under the EPCG scheme. So, these are some of the guidelines the importer of capital goods. So, this scheme is largely related to the capital goods only. The importer of capital goods must file the application with necessary supporting documents with the director general of foreign trade.

So, we have already learned about the director general foreign trade in the last lecture. So, it is a very important premium body, which is a responsible for in the foreign trade policies and basically their businesses export import business.

The main objective of this scheme is to encourage the import of capital goods for export production. So, this for whenever you require certain capital goods or items, which are important for the production of export oriented goods. In that case the EPCG comes into you know the plays it is role and facilitates the entire process.

(Refer Slide Time: 13:24)

Cont..

- The following types of capital goods can be imported into India at zero customs duty under the EPCG scheme:
 - Plant, machinery, equipment or accessories required for manufacture or production, either directly or indirectly, of goods or for rendering services, including those required for replacement, modernization, technological up gradation or expansion.
 - Packaging machinery and equipment ✓
 - Refrigeration equipment
 - Power generating sets
 - Machine tools
 - Equipment and instruments for testing, research and development, quality and pollution control.
 - Capital goods used in manufacturing, mining, agriculture, aquaculture, animal husbandry, floriculture, horticulture, poultry, sericulture and viticulture as well as those used in services sector.
 - Computer software systems ✓

IT ROORKEE | NIEL ONLINE CERTIFICATION COURSE

The following types of goods, capital goods can be imported into India at zero customs duty, under this scheme. What are they? Plant machinery equipment or accessories required for manufacture or production either directly or indirectly of goods or for rendering services including those required for replacement, modernization, technological up gradation. So, as we said the EPCG is also responsible for a up gradation of the technology right.

Packaging machinery and equipment, refrigeration equipment, power generating sets, machine tools, equipment and instruments for testing research and development, quality and pollution control. Then capital goods in used in manufacturing, mining, agriculture, aquaculture, animal husbandry, floriculture, horticulture, poultry, sericulture, viticulture as well as those used in the services sector and finally, computer software systems.

So, the EPCG has a very big role to play; because it helps in the import of the capital goods and up gradation of the capital goods of the technologies also. So, it play's a very vital role in the entire export sector.

(Refer Slide Time: 14:33)

7. Export Processing Zones (EPZs)

- An Export Processing Zone is a specific type of **Free Trade Zone (FTZ)**, set up generally in developing countries by their governments to import plant, machinery, equipment and material for the manufacturing of exported goods **without the payment of duty**.
- The basic objectives of EPZs are to **enhance foreign exchange earnings, develop export-oriented industries, generate employment opportunities and promote industrial and commercial exports**.
- Export Processing Zones are **industrial estates situated near seaports or airports**. They are intended to provide an internationally competitive **duty free environment for export production at low cost**. This enables the products of EPZs to be competitive, **both quality-wise and price-wise**, in the international markets.
- EPZs have set up at various places in India which include: **Kandla (Gujarat)**, Santa Cruz (Mumbai), Falta (West Bengal), Noida (Uttar Pradesh), Cochin (Kerala), Chennai (Tamil Nadu), and Vishakhapatnam (Andhra Pradesh).
- Santa Cruz zone is exclusively meant **for electronic goods and gem and jewellery items**. All other EPZs deal with **multifarious items**.

IIT ROORKEE NFEI ONLINE CERTIFICATION COURSE

The next important body you can say or scheme that the government strategies the Export Processing Zones EPZ's. So, what is this Export Processing Zone? Export processing zone is a specific type of Free Trade Zone, FTZ right, setup generally in developing countries by their governments to import plant machinery equipment and material for the manufacturing of exported goods without the payment of duty right.

The basic objective is to enhance foreign exchange earnings, develop export oriented industries, generate employment opportunities and promote industrial and commercial exports. So, Export Processing Zones are industrial estates, you must have heard of industrial estates in your localities and regions where you are staying.

So, these come under the EPZ's right. Situated near seaports or airport I come from a place where I am close I stay close to an seaport. Right that is a, we have a port out there and we have our own industrial estate. So, these are basically that zones which help in the entire process of business.

They are intended to provide an internationally competitive duty free environment, for export production at low cost right. This enables the product of EPZ's to be competitive both quality wise and price wise because then the transportation cost and other cost comedown.

So, in terms of price they become very competitive right EPZ's have been set up at various places in India like, Kandla in Gujarat, Santa Cruz in Mumbai, Falta in West Bengal, Noida Uttar Pradesh, Cochin in Kerala, Chennai in Tamil Nadu, Vishakhapatnam Andhra Pradesh right.

Santa Cruz basically is exclusively meant for electronic goods and gem and jewellery items, all other EPZ's deal with different kinds of multifarious items ok.

(Refer Slide Time: 16:32)

Special Economic Zones (SEZs)

- It is a specially defined geographical area for trade, economic activity, production and other commercial activities.
- While correcting the shortcomings of the EPZ model (multiplicity of controls and clearances, the absence of world-class infrastructure and an unstable fiscal regime), some new features were incorporated in the Special Economic Zones (SEZs) Policy announced in April 2000.
- Thus, the EPZs have converted to Special Economic Zones (SEZs) which are **more advance form** of export processing zones.
- The SEZs are free from all rules and regulations governing imports and exports units except relating to labour and banking.

IIT ROORKEE NITEL ONLINE CERTIFICATION COURSE

Then we come to the under the, under this only EPZ's we have something called the Special Economic Zones right. So, what is this Special Economic Zone? It is a specially designed geographical area right, for trade, economic activity, production and other commercial activities.

So, what is basically this, what it is? It is a geographical area which is done with this purpose right. So, what it is what does happen let us see, while correcting the shortcomings. So, EPZ model has some shortcomings right. So, for example, like the multiplicity of controls and clearances the absence of world class infrastructure and an unstable fiscal regime right, so these were some of the shortcomings of the EPZ model.

So, in this SEZ's, this were corrected. So, some new features where incorporated in the SEZ's policy announced in April 2000, the EPZ's have converted to SPZ's SEZ's which are more advanced form of Export Processing Zones.

So, the EPZ's only have been recreation now today's special economic zones. These are free from all rules and regulations governing import and export units except relating to labour and banking ok.

(Refer Slide Time: 17:48)

Special Economic Zone(cont.)

- SEZs play a key role in rapid economic development of a country.
- The benefits of operating within an SEZ include tax breaks for business owners and independence.
- The main facilities of the SEZ Act are:
 - Import and export of all goods is freely allowed without payment of any duties/ taxes.
 - Exemption from Income Tax Act as well as industrial licensing for SSI items.
 - 100% FDI is permitted in the units through domestic route.
 - There is no interference from custom authorities inside the zone.
 - The supplies made to SEZ units are treated as exports.
 - The units are exempted from payment of CST as well as Service Tax.

IT ROORKEE NPTEL ONLINE CERTIFICATION COURSE

SEZ's play a key role in the rapid economic development of a country, so you must have seen that governments play lot of emphasis on the special economic zones right.

So, benefits of operating within an SEZ, include tax breaks for business owners and independence. The main facilities, some of the main facilities under the SEZ act are import and export of all goods is freely allowed without payment of any duties or taxes. So, you do not have to pay right exemption from income tax act as well as industrial licensing for SSI items right.

100 percent FDI is permitted in the units through the domestic route right. There is no interference from custom authorities inside the zone. The supplies made to SEZ act treated as exports right.

The units are exempted from payment of CST as well as service tax right. So, some these are some major benefits right. And these benefits is what makes it very attractive some of the success stories for example, Nokia Special Economic Zone in Tamil Nadu.

(Refer Slide Time: 18:54)

Some Success Stories in SEZs

- ❖ Nokia Special Economic Zone in Tamil Nadu (Telecom equipment's SEZ)
- ❖ Mahindra City SEZ, Tamil Nadu (Apparels and fashion accessories; IT/Hardware; auto ancillary)
- ❖ Wipro Limited, Andhra Pradesh (IT SEZ)
- ❖ Biocon Limited, Karnataka (Biotech SEZ)
- ❖ Reliance Jamnagar Infrastructure Ltd., Gujarat (Multi Product SEZ)
- ❖ Maharashtra Airport Development Corporation Ltd., Maharashtra (Multi product SEZ)
- ❖ Hyderabad Gems Limited, Andhra Pradesh (Gems and Jewellery SEZ)
- ❖ Mundra Port and Special Economic Zone, Gujarat (Multi product SEZ)

IT ROORKEE | NPTEL ONLINE CERTIFICATION COURSE

Make especially for Telecom equipment's right. Mahindra City SEZ in Tamil Nadu again for apparels and fashion accessories IT hardware auto ancillary, Wipro Limited Andhra Pradesh IT, Biocon Limited for Biotech, Reliance Jamnagar Infrastructure Limited multi product it is a multi product SEZ. Maharashtra Airport Development Corporation for multi product, Hyderabad Gems Limited gems and jewellery. So, Mundra Port for multiproduct again.

(Refer Slide Time: 19:37)

Questions

- **Who can set up SEZs? Can foreign companies set up SEZs?**
Any private/public/joint sector or state government or its agencies can set up an SEZ.
Yes, a foreign agency can set up SEZs in India.
- **Who monitors the functioning of the units in SEZ?**
The performance of the SEZ units are monitored by the unit approval committee consisting of development commissioner, custom and representative of state government on an annual basis.
- **Will it be possible to supply to other units in SEZ?**
Yes. Inter-unit sales are permitted as per the SEZ policy. A buyer procuring from another unit pays in foreign exchange.

IT ROORKEE | NPTEL ONLINE CERTIFICATION COURSE

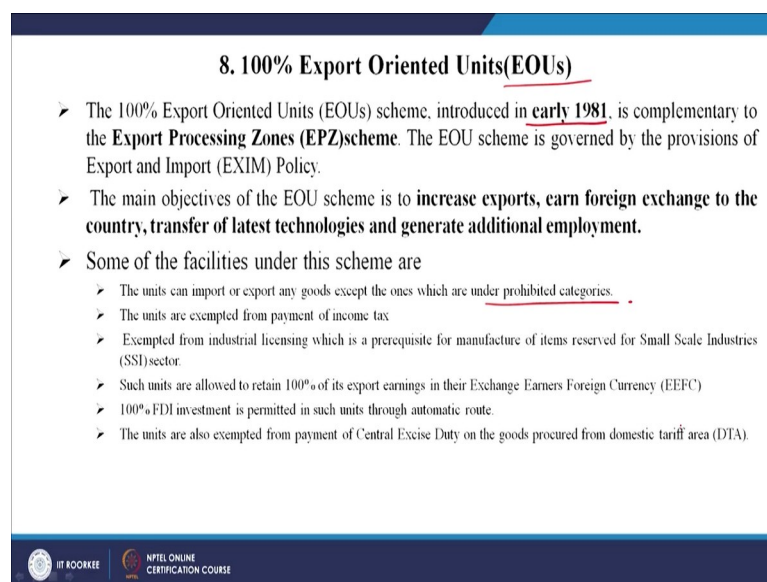

So, these are some of the success stories under SEZ categories ok. So, the question comes is who can set up SEZ's? Can foreign companies set up SEZ's? So, as you saw some of the names for example we said Biocon, Reliance, Wipro, Mahindra, Nokia.

So, the name of the companies are associated right so; that means, can anybody setup? So, the question here is can foreign company set up SEZ's? Any private public joint sector or state government or it is agencies can set up an SEZ. So, the SEZ the good thing is there is a public private partnership basically right.

A foreign agency also can set up SEZ's in India right. Who monitors it is functioning the performance of the SEZ units are monitored by the unit approval committee, consisting of a development commissioner, custom and representative of state government, on an annual basis ok.

Will it be possible to supply to other units in the SEZ right, within the SEZ or something yes. Inter unit sales are permitted as per the SEZ policy a buyer procuring from another unit pays in foreign exchange.

(Refer Slide Time: 20:44)

8. 100% Export Oriented Units (EOUs)

- The 100% Export Oriented Units (EOUs) scheme, introduced in early 1981, is complementary to the **Export Processing Zones (EPZ)** scheme. The EOU scheme is governed by the provisions of Export and Import (EXIM) Policy.
- The main objectives of the EOU scheme is to **increase exports, earn foreign exchange to the country, transfer of latest technologies and generate additional employment.**
- Some of the facilities under this scheme are
 - The units can import or export any goods except the ones which are under prohibited categories.
 - The units are exempted from payment of income tax
 - Exempted from industrial licensing which is a prerequisite for manufacture of items reserved for Small Scale Industries (SSI) sector.
 - Such units are allowed to retain 100% of its export earnings in their Exchange Earners Foreign Currency (EEFC)
 - 100% FDI investment is permitted in such units through automatic route.
 - The units are also exempted from payment of Central Excise Duty on the goods procured from domestic tariff area (DTA).

ITR ROORKEE NPTEL ONLINE CERTIFICATION COURSE

So, these are some of the questions, which are connected with the SEZ's which may be now clear to you. The next you know thing that comes in this export oriented schemes and measures is the 100 percent export oriented units or EOU's Export Oriented Units. Now what are these? These are introduced in the early 1981.

And it is complimentary to the export processing zones scheme. The EOU is governed by the provisions of this Exim policy right. So, what is its main objective? To increase the exports, earn foreign exchange to the country, transfer of latest technologies and generate additional employment right.

What are the facilities under this scheme, under this hundred percent export oriented units? The facilities are the units can import or export any goods except the ones which are under the prohibited categories right.

The units are exempted from payment of income tax. So, some of the things you can see with the you know, the other schemes also they are some common things right. Exempted from industrial licensing which is a prerequisite for manufacture of items reserved for the small scale industries the SSI's right.

Such units are allowed to retain 100 percent of its export earnings in their exchange earners foreign currency ok. 100 percent FDI investment is permitted in such units through the automatic route right. The units are also exempted from payment of central exercise duty on the goods procured from domestic tariff area. So, these are some of the you know facilities or the benefits of the export oriented units.

(Refer Slide Time: 22:26)

Export Promotion Measures

The Ministry of Commerce implements the following export promotion measures at micro level to resolve the short problems faced by the trade and industry related to external sector :-

- ✓ • **ASIDE Scheme** (Assistance to states for development of export infrastructure and allied services)
- ✓ • **Trade Infrastructure for Export Scheme (TIES)**
- ✓ • **MAI Scheme** (Market Access Initiative)
- ✓ • **MDA Scheme** (Market Development Assistance)

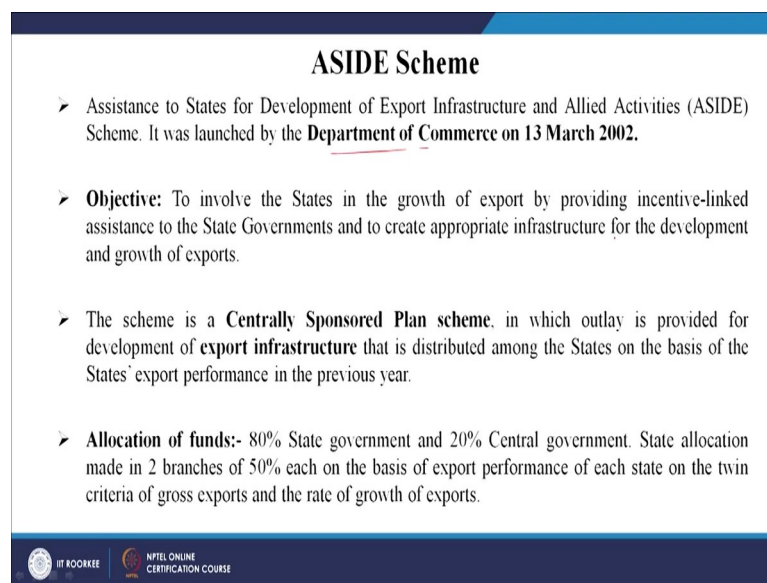

IIT ROORKEE | NPTEL ONLINE CERTIFICATION COURSE

Some other new schemes have come in recently and we will talk about this also some new export promotional schemes.

The ministry of commerce has implemented the following export promotion measures at micro level. Now this is important. To resolve the short problems short term problems faced by the trade and industry related to the external sector.

So this schemes are like, for example, the ASIDE scheme the ties MAI and MDA scheme right. So, let us understand each one of them, what this schemes are because they are working at the micro level. Why the government had thought of it because; obviously, to take care of the short term you know the short term problems right.

(Refer Slide Time: 23:10)

ASIDE Scheme

- Assistance to States for Development of Export Infrastructure and Allied Activities (ASIDE) Scheme. It was launched by the Department of Commerce on **13 March 2002**.
- **Objective:** To involve the States in the growth of export by providing incentive-linked assistance to the State Governments and to create appropriate infrastructure for the development and growth of exports.
- The scheme is a **Centrally Sponsored Plan scheme**, in which outlay is provided for development of **export infrastructure** that is distributed among the States on the basis of the States' export performance in the previous year.
- **Allocation of funds:-** 80% State government and 20% Central government. State allocation made in 2 branches of 50% each on the basis of export performance of each state on the twin criteria of gross exports and the rate of growth of exports.

IIT KOOBEE NPTEL ONLINE CERTIFICATION COURSE

What is this ASIDE scheme? First one so, as a name suggest assistance to states for development of export infrastructure and allied activities. So, the full form is assistance to states, for development of export infrastructure and allied activities. This scheme was launched by the department of commerce on 2002 march, 13th march, 2002. What is the objective of this scheme? To involve the states in the growth of export by providing incentive linked assistance right.

So, there are incentives attached. So, the state governments would try to be more oriented and progressive towards, or try to progress in this export businesses right and to create appropriate infrastructure for the development and growth of exports.

So, as we have seen there are lot of thing which are required for the development of exports, for example, unit right infrastructure you need took you know settle down some

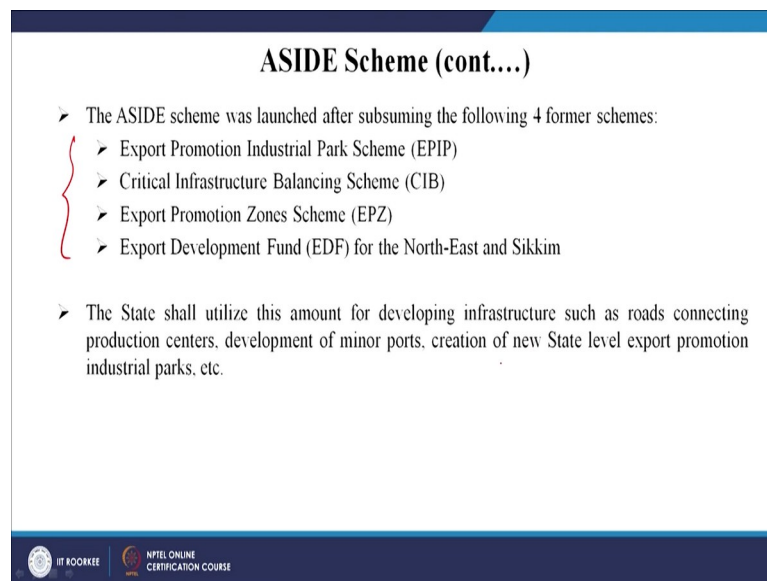

of the policies or remove some of the, make some of the policies less difficult for the clearance policies and the all these things.

So, to do all these things the government has started such schemes right. This scheme is a centrally sponsored plan scheme, in which outlay is provided for development of export infrastructure. That is distributed among the states on the basis of the states export performance in the last year previous year right.

And how is the funds allocated? 80 percent state government and 20 percent central government. So, the 80 percent of the fund has to come from this state governments and 20 percent will given by the central government.

State allocation made in two branches of 50 percent each on the basis of export performance of each state, on the twin area of gross exports and the rate of growth of exports. So, the ASIDE scheme is largely done for encouraging the states, to participate in development of exports and develop accordingly the infrastructure.

(Refer Slide Time: 25:14)

ASIDE Scheme (cont....)

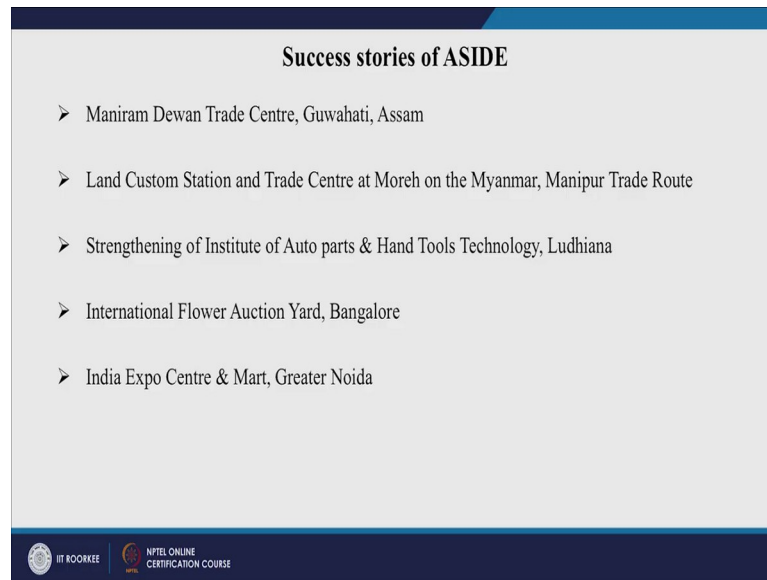

- The ASIDE scheme was launched after subsuming the following 4 former schemes:
 - Export Promotion Industrial Park Scheme (EPIP)
 - Critical Infrastructure Balancing Scheme (CIB)
 - Export Promotion Zones Scheme (EPZ)
 - Export Development Fund (EDF) for the North-East and Sikkim
- The State shall utilize this amount for developing infrastructure such as roads connecting production centers, development of minor ports, creation of new State level export promotion industrial parks, etc.

IIT ROORKEE | NPTEL ONLINE CERTIFICATION COURSE

The ASIDE scheme was launched after subsuming the following 4 schemes. So, this is these 4 schemes, that are merge where merge to make this ASIDE scheme. Export Promotional Industrial Park Scheme right EPIP, Critical Infrastructure Balancing scheme CIB, Export Promotion Zone Scheme EPZ, Export Development Fund for North East and Sikkim EDF, right.

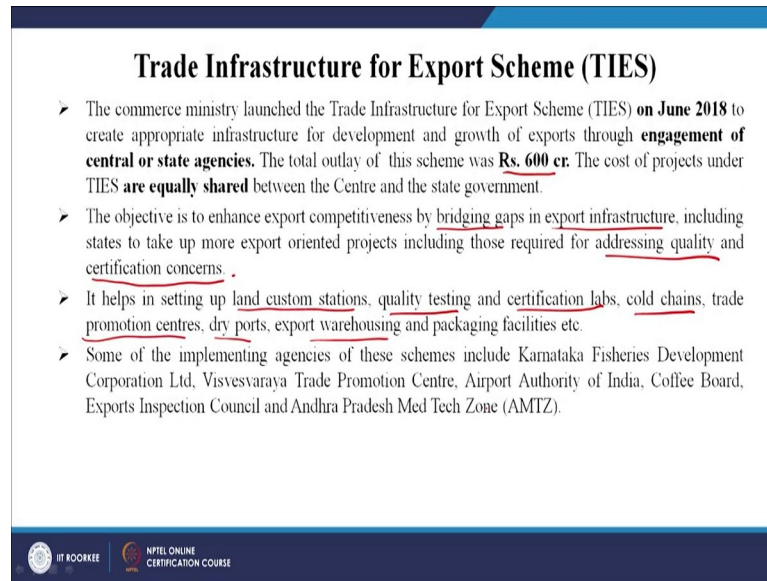

The state shall utilize this amount for whatever the you know government gives, for developing infrastructure such as roads connecting to the production centers development of minor ports, creation of new state level export promotional industrial, parks, etcetera ok.

(Refer Slide Time: 25:56)

Some of the success stories in India are for example, Maniram Dewan Trade Centre in Guwahati, Land Custom Station and Trade Centre at Moreh on the Myanmar, Manipur Trade Route, Strengthening of Institute of Auto parts and Hand Tools Technology Ludhiana, International Flower Auction Yard Bangalore, India Export Centre and Mart, Greater Noida right.

Trade Infrastructure for Export Scheme (TIES)

- The commerce ministry launched the Trade Infrastructure for Export Scheme (TIES) on **June 2018** to create appropriate infrastructure for development and growth of exports through **engagement of central or state agencies**. The total outlay of this scheme was **Rs. 600 cr**. The cost of projects under TIES are **equally shared** between the Centre and the state government.
- The objective is to enhance export competitiveness by bridging gaps in export infrastructure, including states to take up more export oriented projects including those required for addressing quality and certification concerns.
- It helps in setting up land custom stations, quality testing and certification labs, cold chains, trade promotion centres, dry ports, export warehousing and packaging facilities etc.
- Some of the implementing agencies of these schemes include Karnataka Fisheries Development Corporation Ltd, Visvesvaraya Trade Promotion Centre, Airport Authority of India, Coffee Board, Exports Inspection Council and Andhra Pradesh Med Tech Zone (AMTZ).

IT ROORKEE | NFTEL ONLINE CERTIFICATION COURSE

The next after the ASIDE is the Trade Infrastructure for Export Scheme TIES right. So, the commerce ministry launched the Trade Infrastructure for Export Scheme on June 2018, to create appropriate infrastructure for development and growth of exports, through engagement of central and state agencies.

The total outlay was 600 crore and the cost of the projects under TIES are equally shared, there it was 80, 20 in ASIDE, here it is equally shared between the Centre and the state government.

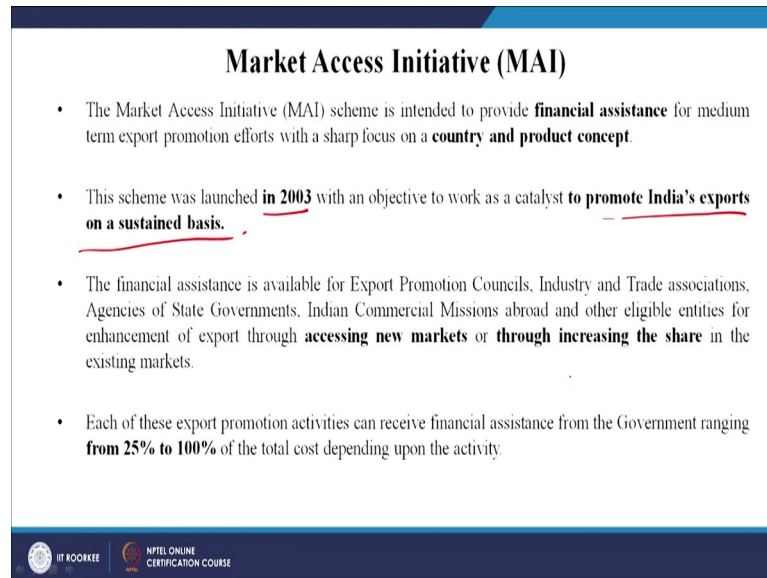

What is the objective of this? The objective is to enhance export competitiveness, by bridging the gap in export infrastructure including states to take up more export oriented projects. Including those required for addressing quality and certification concerns. So, these concerns if it would be removed or address then export competency would be enhanced obviously.

It helps in setting up land custom stations, quality testing and certification labs, cold chains, trade promotion centre, dry ports export warehousing and packaging facilities etcetera right.

Some of the implementing agencies of these schemes include Karnataka Fisheries Development Corporation Limited, Visvesvaraya Trade Promotion Centre, Airport Authority of India, Coffee Board, Export Inspection Council and Andhra Pradesh Med

Tech Zone right. So, these are some of the schemes and it is objective and the benefits we have seen.

Foreign Trade Organizations in India

- The Government of India has set up various institutions in order to facilitate the **process of foreign trade in our country.**
- The Department of Commerce in the Ministry of Commerce, Government of India, is the **apex body** responsible for the country's external trade and all jurisdiction linked with it.
- This department was established in **the year 1995.**
- It is entrusted with formulating and implementing the **foreign trade policy** and responsibilities relating to **multilateral and bilateral commercial relations**, state trading, export promotion measures, and development and regulation of certain export oriented industries and commodities.

ITR ROORKEE NPTEL ONLINE CERTIFICATION COURSE

So, these are some of the ah you know, these are the four policies as started with the you know government recently and you know. In fact, it has been there for some time, but the government has been trying to develop this more, the present government has been trying to focus more on them.

And trying to you know although they are there from since 2004, 2003, but the point is the government has been trying to give more emphasis on this since recent times. So, that are Exposure in the foreign markets is more and we are, we will have a foothold in this other market in a much better way right. So, this is all we have discussed today.

I will wind up the lecture here and we will continue from the, the next part which is organizations in foreign trade regulations and all. So, foreign trade you know in the business of foreign trade what are the different organizations in India which are assisting in this. So, we will discuss about it in the next class so.

Thank you so much.
